The Correct Answer is **A**

DETAILED SOLUTION

(chs.length will return 2 so ch[0][0] will store 97, ch[0][1] will store 98 and ch[1][0] will store 99, ch[1][1] will store 100. Ca will contain 2 arrays first array size is 2 and second array size is 5, but for both the arrays only 2 values are filled remaining values of second array will have null values)
